

Task	Frequency	Classification	Rationale
Completing programming assignments	Weekly	Collaborate with AI	AI helps explain concepts and debug code, but I must understand and write the final solution.
Solving DSA problems	Daily	Just Me	I need to build my own problem-solving skills for placements and interviews.
Building full-stack projects	Weekly	Collaborate with AI	AI speeds up development, but architectural decisions and integration require my judgment.
Debugging React/FastAPI applications	Weekly	Delegate to AI with Review	AI can identify likely bugs quickly, but I verify every suggested fix before applying it.
Writing GitHub README files	Occasionally	Delegate to AI with Review	AI improves structure and wording while I verify technical accuracy.
Writing internship/job application emails	Occasionally	Delegate to AI with Review	AI creates professional drafts that I personalize before sending.
Preparing resume updates	Monthly	Collaborate with AI	AI improves formatting and wording, but I ensure all information is truthful and relevant.
Managing Athletics SIG event posters/content	Weekly	Collaborate with AI	AI helps with design ideas and copy-writing, while I finalize branding and event details.
Researching new technologies	Weekly	Collaborate with AI	AI summarizes documentation, but I verify important technical details from official sources.
Organizing GitHub repositories	Monthly	Fully Automate	Repetitive repository maintenance can be handled by scripts or AI-assisted tools.
Scheduling weekly study plan	Weekly	Delegate to AI with Review	AI generates efficient study schedules that I adjust according to deadlines.
University examinations	Weekly	Just Me	Exams assess my own understanding and must be completed independently to maintain academic integrity.

Target Task	Classification	Success Definition
Debugging Full-Stack Applications (React/FastAPI)	Delegate to AI with Review	AI identifies the root cause of bugs and suggests a fix that I verify successfully within one debugging session, with the application working as expected.
Writing Technical Documentation (README & Setup Guides)	Delegate to AI with Review	AI produces a well-structured documentation draft that requires only minor edits before publication and accurately describes the project's setup, usage, and features.
Learning New Technologies (AI, Full-Stack, Cloud)	Collaborate with AI	AI provides accurate explanations, practical examples, and a learning roadmap that helps me understand new concepts faster while I verify important information using official documentation.
